

A: your data is the result of an integral sign, meaning you convert it to int type. In your dt.dta, the first (column) variable var17 should actually be type Numeric, (the second (column) variable var18 should be numeric) but you'll have to be sure about your data structure if you want to switch to a specific type (if your data can be of one specific type, you can switch the code and your data structure to "if-else" conditions. in order to use int type, you can either do dt.recode\$var17
